

QA visit: steps for the visiting team

NOTICE TO CENTRE Announced. Date agreed and document list sent in advance.	TIME ON SITE One full working day for up to 3 SICIP courses; two days for more courses or two shifts	WHAT IT CHECKS All 9 quality components, from registration to certification and job placement	RECORD QA Visit Report (Annex-3), signed by every visiting officer
--	--	---	--

Preparation in the office (one to two weeks before)

#	Task	What to do	Report
P1	Agree the date	Fix the date(s) with the Principal / Centre Manager on a day when batches are running. Ask that the Principal, trainers, job placement officer and accounts person be present.	1
P2	Send the document list	Send "QA visit: documents to keep ready at the institute" so every file is in one place, sorted by course and batch.	2–10
P3	Study the centre	Read the MoU and Business Plan, the PIU / SDCMU capacity assessment, the last QA report and all surprise visit reports since. Take target, enrolled, certified, job-placed and dropout figures from TMS.	1.20–1.60
P4	Split the work	Ask the centre for its routine: each course's batches, shift, classroom and workshop. Give each officer a set of courses for the floor (steps 2–3) and a set of sections for documents (for example 2–5 and 6–10). Pick one trainee per course from TMS, at least 3, to trace in step 5.	—

Order of work at the centre

#	When	Step	What to do	Report
1	Start, 20–30 min	Opening meeting	Explain the purpose, the agenda and who checks what. Record the people met, registration status and MoU details, and confirm the course table and cumulative figures against TMS.	1.00–1.50
2	Morning, while classes run	Walk the training floor	- Go course by course through every classroom and workshop in the routine, and any other room in use. Count trainees in each running batch and compare with the register and TMS; ask the reasons for dropouts. - In each course's workshop check tools against that course's CS list, consumables, PPE in use, utilities, ventilation, lighting and fire safety. Watch one session of each course for delivery method; with many courses, watch at least one theory and one practical session.	1.60–1.62, 8, 9
3	Morning	Hear trainees and trainers	Talk to at least two trainees from each course with no staff present, then to one trainer of each course on the training environment and resources. Record each person's feedback.	11, 12
4	Midday to afternoon	Review documents by component	Go through sections 2 to 10 in order, with the responsible staff member present for each. Check course-level files (CS, CBLM, TDP, trainers, assessment, certification) for every course. For every criterion, see the evidence itself, not a verbal answer, and mark it seen, not seen or not applicable.	2–10
5	Afternoon	Trace one trainee per course	Follow each trainee picked in P4 through advertisement, application, admission form, attendance, formative and final assessment, certificate and job placement record. A broken link shows where the system fails.	4, 5, 10
6	Afternoon	Check earlier findings	Open the monitoring logbook and check the action taken on each finding of the last QA and surprise visits.	2, 8
7	Before exit, 30 min	Team discussion	Without centre staff, agree the strengths and weaknesses of each of the 9 components, the major findings and the recommendations.	13–15
8	End, 20–30 min	Exit meeting	Present the major findings and recommendations to the Principal and staff. Agree an action and a date for each recommendation, and ask the centre to enter them in the monitoring logbook.	14, 15

Rules on site

- See the training floor in the morning while trainees are present; read files after classes end. For a second shift, walk its rooms when it starts.
- Record findings per course; a weakness in one course is not a weakness of the whole centre.
- Accept only documents shown to you. "It is in the office" is recorded as not seen.
- Sample and cross-check: TMS against registers, registers against vouchers, placement register against employer letters.
- Photograph evidence that supports a weakness or a major finding.
- Keep the discussion of ratings and findings inside the team until the exit meeting.

After the visit

- Complete every section of Annex-3 and have every visiting officer sign it.
- Submit the report to your supervisor and file it with the centre's visit records.
- Send the recommendations and agreed dates to the centre in writing.
- Report any serious non-compliance (ghost trainees, fees charged, false placements) to your supervisor at once.
- Use the recommendations as the issue list for the next surprise or QA visit.

TMS = Training Management System, MoU = memorandum of understanding, PIU = project implementation unit, SDCMU = skills development coordination and monitoring unit, CS = competency standard, CBLM = competency-based learning material, TDP = training delivery plan, PPE = personal protective equipment. Section numbers refer to Annex-3.
